1. It is requested that D/OS prepare for I/GM a series of map overlays plotting various order of battle and transportation information on the European Satellites. These are to be used to assist in the correlation and evaluation of available information as well as future reporting on the deployment of guided missiles in this area.

2. Since it is believed that East Germany is the only Satellite in which guided missiles are deployed at present, it is requested that that country be given priority treatment. Poland and Czechoslovakia are more suspect than the other Satellites as possible deployment sites for guided missiles. Overlays for these countries, however, probably should not be undertaken until those on East Germany have been completed or are well underway. Although there appears to be no pressing need at present for overlays on the other Satellites, it is possible that such a need may develop some time in the future.

3. The overlays on East Germany should be done on a map scale of 1:750,000. The following overlays are desired:

- a. SPOONHEAT Locations;
- b. GSG AAA Units;
- c. GSG Ammunition Storage;

**SUBJECT: Request for D/CG Support in Guided Missiles Field**

- d. GSEF POL Storage;
- e. GSEF Artillery Units;
- f. GSEF Airfields;
- g. GSEF Headquarters Units;
- h. Standard gauge railroads with Polish and Czech border crossing points.

It is requested that these overlays be completed by 1 April 1960. I/GM will pick up each overlay as it is completed. Subsequent research and reporting will probably necessitate changes to this list in the future.

4. It is anticipated that similar needs will arise with regard to the Soviet Union. These will require less detail than that requested on East Germany.
